

Timer Based Aquarium Light

Index number: 200740V

Product description

The product consists of an aquarium light that turns off after a set interval of time. The timer options are selected according to the requirements of fish and plant life to thrive. The device can be used in medium sized tanks and light should be attached to the rood of the fish tank. The recommended timer option for a medium sized fish tank is 8 hours and should be turned on between sun rise and sun set.
